There is nothing quite like fall in Colorado!

Thank you for all of your support this season. Our “Award Winning” team is dedicated to working hard to make your landscape look its best. Thank you for your business and we appreciate all your continued referrals!

After two decades of professional lighting design, for retail shops, offices, private homes, apartments, neighborhood promenades and other various projects, we’ve had the opportunity to shed light on thousands of our customer’s lighting needs. With that experience comes a passion and understanding for the art and science behind the design, installation and service of outdoor lighting.

Outdoor lighting unifies relationships between your house and the landscape, extends the use of your outdoor spaces and lends a sense of security and refined ambiance. With current lighting systems we’re able to retrofit your existing lighting to LED bulbs without switching out your current fixtures. LED offers drastically reduced electricity and maintenance needs, as well as greater flexibility.

We are proud of the positive response of the Designsapces Colorado Tip of the Week and our company blog. Our Tip of the Week is distributed by email and if you are not currently on the distribution list, you can sign up on our website www.designscapescolorado.com. There is very good information there about what is currently relevant and important in our industry.

We want to again, reiterate a thanks to all of our friends and clients for their support this season.

planning for spring

Bulbs and Pansies

With spring in mind, we are now bulk ordering bulbs. In order to allow adequate planting time, and for best color and variety availability, please order by September 30th, 2015. Planting will begin in early October.

As the summer annuals fade into the fall, pansies are a great option to extend the season. **We recommend supplementing your beds and pots now with the addition of pansies.** To achieve maximum bloom from your pansies, we recommend periodic watering during the dry spells in the winter months.

Fall & Winter Clean-ups, Trimming and Pruning

Take advantage of the great fall weather now and the nice days we tend to have in January or February with a clean-up. Fallen leaves and loose undesirable organic material will be removed from rock and mulch areas and, where necessary, perennials cut back. Pruning and shaping of shrubs as well as other landscape maintenance needs can also be done concurrently with your clean-up. Fall and winter maintenance helps to keep insects and pests away that like to take cover in the organic material. You'll be happy you took advantage once spring comes around.

Winter Watering

An often overlooked key ingredient to any good landscape; winter watering provides supplemental nutrients in dry spells. All plants (turf included) still need timely moisture through snowmelt or by supplemental hand watering.

Seasonal Décor

Holiday decorations are fun, colorful, and add festive charm to your home! Pots, planters, outdoor floral arrangements, and wreaths can be customized to accentuate your home and garden. With our skilled team of designers and years of experience, we can help design and install the best

Display your beautiful pots with seasonal décor!

our services

Landscape Construction and Renovation

The fall and winter seasons are a great time for landscape projects of all types. If you are looking to add a few shrubs or want an entire landscape renovation we can cater to your needs. Why is it a good idea to start your project in the winter time? During the winter there is more time to plan for a project, hardscape construction can be done, there is a better selection of plant material available, and there will be more time to enjoy your yard next summer! One of our professional designers can meet with you for a consultation to listen to your ideas and share our thoughts. Call us to set up an appointment!

Sprinkler Winterization

We will start scheduling this service for the second week in October and recommend no later than November 14th (remember that your plants may still need to be hand watered if we are having a moderate winter). It is highly probable that we will experience early cold spells and even snow before some systems are winterized. Proper maintenance and care includes insulating your backflow against these temporary cold spells. For newly installed systems by Designscares Colorado, this is a complimentary service, but must be scheduled with our maintenance department.

NOTE: Sprinkler systems are winterized with compressed air, and to the best of our knowledge, there is no water left in the lines, therefore we do not warranty any freeze damage that may occur. As a note of conservation, please remember to reduce your watering schedule by 20% during the fall season.

Sprinkler Winterization Pricing

1 to 10 Zones.....	\$ 105.00
11 to 20 Zones.....	\$ 115.00
21 to 30 Zones.....	\$ 125.00
31 to 40 Zones.....	\$ 135.00

MEET OUR STAFF!

HUMBERTO MOSQUEDA - Enhancements Supervisor

If you've had any annuals or bed care done with Designscares Colorado over the past 10 years, Humberto has probably, somehow been involved in the process. He supervises our annual and bed care crews and has more than 15 years experience with flowers! Humberto grew up in the city of Guanajuato in central Mexico. His warm smile, refreshing personality and commitment to hard work continue to make him a client favorite. Planting annuals is one aspect of his work where he takes great pride. Planting pots especially lends to his creativity and he is heavily influenced by the Jardin Hidalgo he experienced growing up in Mexico. He has been married for 32 years with four children and has recently started a new phase in life as a grandfather!

In The News!

- Phil Steinhauer received the John Garvey Person of the Year award from Associated Landscape Contractors of Colorado for his contributions and leadership to ALCC!
- Gabriel Leon received the Industry Elite MVP award from ALCC for recognition of his excellence.
- Six of our team members received Certified Landscape Technician designations from NALP including; Gabriel Leon, Garrett Holmes, Doug Gibb, Reggie Cooper, Oscar Chacon and Chris Stone.
